SUMMARY

Software Engineering intern candidate and B.Tech CSE (Data Science) student (expected 2028) with a 6-month Python Full Stack Developer internship at Nlite Solutions Limited and object-oriented programming experience in Java, C++, and Python. Designed, developed, and deployed full-stack applications using Django, React, Node.js, Spring Boot, and Firebase, including an Android app used by around 100 users. Experienced in gathering user requirements, troubleshooting production issues.

EDUCATION

B.Tech - Computer Science and Engineering (Data Science) [2025 - Expected 2028]

MVGR College of Engineering, Vizianagaram, Andhra Pradesh | CGPA: 8.4

Diploma in Computer Engineering [2022 - 2025]

Government Polytechnic, Srikakulam, Andhra Pradesh | 91%

Secondary Education [2017 - 2022]

Oakland English Medium School, Vizianagaram, Andhra Pradesh | 96%

WORK EXPERIENCE

Python Full Stack Developer Intern - Nlite Solutions Limited [6 Months]

- Designed and developed full-stack web application projects using Python and the Django framework.

Full-Stack Web Development & Practical Work [Independent / Project-Based]

- Designed, built, and deployed multiple web applications for academic, hackathon, and real-world use cases.
- Worked across frontend, backend/API integration, databases, authentication, cloud storage, and deployment.
- Troubleshoot and resolved production issues involving hosting, APIs, Firebase, cloud storage, and notifications.

TECHNICAL SKILLS

Programming: Java, C++, Python, C (Object-Oriented Programming, REST APIs, Debugging)

Web Development & Frameworks: HTML, CSS, JavaScript, React, Vite, Django, Node.js, Express.js, Spring Boot

Databases & Cloud: MySQL, SQL, Firebase, Firestore, AWS S3, Vercel

AI & Tools: Machine Learning, Generative AI, Gemini AI, Data Analysis, Git, GitHub, VS Code, Figma, PWA

CERTIFICATIONS & ACHIEVEMENTS

- Cisco Python Course | Cisco Computer Networks Course | Cisco AI/ML Course
- Python Full Stack Developer Internship Certificate (Nlite Solutions Limited)
- Participated in national-level and college-level hackathons; developed AI, education and community solutions.

PROJECTS

1. KSP Sahayak - AI-Powered Police Investigation Platform (React, Vite, Express.js, Firebase, Gemini AI)

- Built an AI-assisted crime investigation and analytics platform with case/FIR management and relationship graphs.
- Implemented role-based dashboards, multilingual/voice interaction, audit logging, and automated reports.

2. FINAURA - AI-Powered Financial Technology Platform (Online Hackathon Project)

- Developed FINAURA to simplify personal financial management through secure data handling and financial insights.
- Designed and integrated responsive dashboards and user-centric workflows for clear financial visualization.

3. Smart Reminder (PWA, Mobile Application, Notifications)

- Developed a smart reminder platform for managing personal reminders, birthdays, and scheduled activities.
- Explored PWA-to-Android deployment using modern packaging technologies with mobile-friendly interface.

4. Community / Village Grievance System (Full Stack, Firebase, Web Application)

- Developed digital platform for submitting, tracking, and managing community grievances connecting to authorities.
- Implemented responsive UI and deployed application for real-world demonstration and evaluation.

5. Vinodh Sir Math Classes (Android App APK & Web Client Project - ~100 Users)

- Developed and maintained the Android APK (the main deliverable) now used by around 100 active students.
- Built a mock test series website for RGUKT lecturers and promotional website for APK distribution.
